## SUMMARY

Full Stack Developer with 5+ years of experience building scalable and high-performance web applications. Strong expertise in React, Node.js, REST APIs, real-time systems, and database design. Passionate about clean code and solving complex problems.

## TECHNICAL SKILLS

**Frontend:** React.js, Tailwind

**Backend:** Node.js, Express.js, Python(FastAPI)

**Database:** MongoDB, MySQL

**Tools:** Git, GitHub, Jira, Postman, Docker, Redis

**Other:** REST APIs, Socket.IO, CI/CD, System Design Skilled

**AI Tools:** Claude, ChatGPT, GitHub Copilot, Codex CLI

## WORK EXPERIENCE

### Freelance Full-Stack Developer | Independent

Mar 2026 – Aug 2026

- Worked on freelance web development projects, handling client requirements, development, debugging, and delivery.
- Developed applications using React.js, JavaScript/TypeScript, Node.js, and related technologies.
- During this period, I also focused on learning Python and FastAPI through personal projects and hands-on practice.
- Continued improving full-stack development and system design skills.

### Full Stack Developer – Sparta International Bussiness

Feb 2024 – Feb 2026

- Developed interactive user interfaces – built responsive and engaging web applications using HTML, CSS, JavaScript, and React to enhance user experience.
- Developed scalable React applications handling real-time sports data using Socket.IO
- Built REST APIs with Node.js and Express, improving response time
- Integrated PayPal payment gateway with secure user data handling
- Worked in Agile environment with cross-functional teams
- Reviewed code and mentored junior developers

### Full Stack Developer – Eminence Innovation

Feb 2021 – Feb 2024

- Developed interactive user interfaces – built responsive and engaging web applications using HTML, CSS, JavaScript, and React to enhance user experience.
- Optimized website performance – improved page speed by optimizing assets, implementing lazy loading, and reducing unnecessary re-renders in React
- Integrated APIs for dynamic content – fetched and displayed real-time data using RESTful APIs to enhance interactivity
- Version control & collaboration – used Git and GitHub for efficient code management and teamwork
- Server management & deployment – configured and deployed applications on cloud platforms for high availability and performance

## PROJECTS

### E-Commerce Application

- Developed a full-featured e-commerce platform with product listing, cart, checkout, and order management
- Integrated secure payment gateway and order confirmation workflows
- Implemented JWT-based authentication with role-based access for Admin and Users
- Built admin tools for product, order, and user management

### HRMS (Human Resource Management System)

- Designed an HRMS to manage employee onboarding, attendance, leave, and payroll
- Implemented role-based access control for Admin, HR, and Employees
- Built dashboards for employee analytics and reporting
- Ensured secure authentication and authorization using JWT

### B2B Portal

- Developed a multi-vendor B2B portal for managing clients, products, and bulk orders
- Built REST APIs for order processing, invoice generation, and client management
- Implemented vendor and client role-based access with secure authentication

### CMS (Content Management System)

- Built a custom CMS for managing pages, blogs, banners, and media content
- Developed an admin panel with CRUD operations and role-based permissions
- Created SEO-friendly page structures and responsive UI
- Enabled dynamic content updates without code changes

### School Website / School Management System

- Developed a school management platform for students, teachers, and classes
- Implemented admission forms, announcements, and academic content modules
- Built admin dashboard for managing users and website content
- Secured application using authentication and role-based authorization

## EDUCATION

**BA – Economics** — MJPRU
